即将提供符合新“外商投资法”的入境投资自动化双语合同模板

Innovative Contract Solutions for All China-Related Transactions

Companies from all around the world engage in China-related transactions at multiple levels:

- as buyers and sellers of goods and services in cross-border trade transactions with Chinese counterparties
- as inbound investors into China
- as sell-side in Chinese outbound investment transactions, and
- as foreign-investment enterprises (FIEs) in connection with domestic transactions.

YOUR CHALLENGES, OUR SOLUTIONS

Your challenges

- Need Chinese + English contracts
- Need localized contracts
- Need it now
- Need it for less
- Need to talk to a real person

Our solutions

- Automated bilingual contracts
- Drafted in China for China
- Takes under 15 minutes
- Very inexpensive
- Offline legal network

In order for foreign companies to engage effectively with their Chinese counterparts, they need bilingual contracts which meet international standards and address the interests of both parties in a balanced way. However, in the past this required significant additional time and expense, presenting significant barriers to business, especially for SMEs.

Now docQbot provides to all foreign companies an innovative solution utilizing world-leading technology from HotDocs to allow even SMEs to produce highly-customized international-standard bilingual contracts – all in just 15 minutes or less! And the docQbot tool is so powerful that it can be used in connection with inbound, outbound and domestic transactions.

HIGHLY CUSTOMIZABLE

How many different versions can one docQbot base contract template produce?

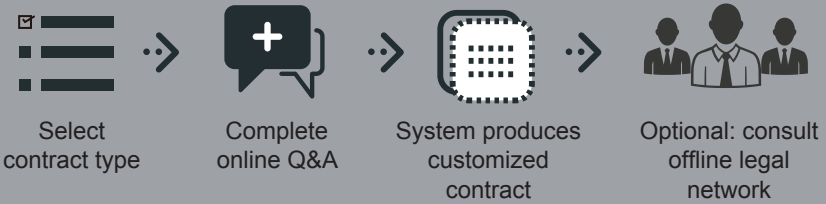

Template	How many?	How fast?
Non-disclosure agmt	248,832	under 10 minutes
Services Agreement	8,455,716, 864	under 15 minutes
Software license	12,785,043,898,368	under 15 minutes
Sale of goods agmt	335,607,402,332,160	under 15 minutes
Distribution agreement	1,534,205,267,804,160	under 15 minutes

docQbot makes each contract uniquely yours, all in just minutes.

SIMPLE TO USE

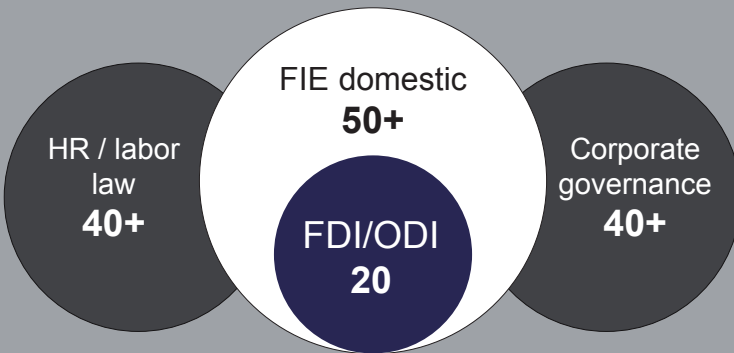

docQbot is so powerful and yet is very simple to use: just go online, select a contract type, spend 10 to 15 minutes to answer a brief series of commercially-focused questions, and then the docQbot system produces a highly-customized bilingual contract draft in a just a matter of seconds!

And if you need additional offline legal support to address any additional “last mile” issues, we can refer you to our network of top lawyers all across China.

ALL THE CONTRACTS YOU NEED

For inbound and outbound transactions, we will provide 20 base templates covering the most common trade and investment transactions, and for domestic transactions we will provide a total of 50 base templates. Each base template can produce tens of thousands and even up to trillions of unique iterations all specifically tailored to your requirements.

In addition to these core template packages, we are in the process of creating automated bilingual templates for a wide range of HR and corporate governance documents for FIEs in China. And we will have a fully updated set of FDI documents by the end of 2019 to reflect the new requirements under the recently adopted Foreign Investment Law.
